Manan Mandaliya

Ph: +91 7984570126 Email: mandaliyamanan@gmail.com LinkedIn: Manan Mandaliya Vadodara,Gujarat

PROFESSIONAL SUMMARY

Full Stack Engineer with **5+ years of experience** building **scalable SaaS applications, enterprise dashboards, and Web3 platforms**. Strong expertise in **React.js, TypeScript, frontend architecture, state management, and API integration**, with hands-on experience in **Node.js, Express.js, and MongoDB.** Experienced in **Solidity** smart contracts, **DeFi/NFT** integrations, and **AI-assisted development.**

TECHNICAL SKILLS

Frontend Development: React.js, TypeScript, JavaScript (ES6+), Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, Bootstrap
State Management & Forms: Redux Toolkit, RTK Query, Pinia, Vue Composables, React Hook Form, Zod
Backend Development: Node.js, Express.js, REST API Development, Business Logic, Middleware, JWT Authentication, RBAC, Request Validation
Databases: MongoDB, Mongoose, PostgreSQL, Schema Design, Data Modeling, Query Optimization
Web3 & Blockchain: Solidity, Ethers.js, Web3.js, Wagmi, RainbowKit, Hardhat, OpenZeppelin, ERC-20, ERC-721, ERC-1155
Infrastructure, Tools & AI: AWS EC2, AWS S3, Docker, Git, GitHub Spec Kit, n8n, OpenAI, Claude, Mistral, Groq, IndexedDB

PROFESSIONAL EXPERIENCE

Sr. Software Engineer | IITIL, Hyderabad | May 2026 – Present

- Architect frontend solutions across **6+ HRMS modules** using **React.js and TypeScript**, establishing reusable component patterns and **type-safe API contracts**.
- Build **reusable UI components** with **Tailwind CSS and shadcn/ui,** promoting consistent design patterns and maintainable frontend architecture.
- Integrate backend APIs using **Redux Toolkit and RTK Query,** implementing caching, mutation handling, and cache invalidation for reliable server-state synchronization.
- Contribute to **database schema design and backend business logic** in collaboration with the team, aligning data models and application workflows with enterprise HRMS requirements.
- Implement **RBAC, schema-validated forms, and scheduling workflows,** using **GitHub Spec Kit and AI-assisted development** to translate requirements into structured implementation plans.

Software Engineer | Helios Solutions, Vadodara | May 2024 – May 2026

- Developed **full-stack features** for dashboards, authentication, and dynamic forms using **React.js, Next.js, Express.js, and MongoDB.**
- Contributed to **REST API development**, implementing business logic, **JWT authentication, RBAC, and request-validation middleware** in collaboration with backend development efforts.
- Optimized M**ongoDB data models** by embedding related documents where appropriate, reducing query overhead and **improving performance by 30–35%.**
- Built **reusable UI components and type-safe forms** using **React, Redux Toolkit, RTK Query, React Hook Form, Tailwind CSS, and Zod.**
- Implemented **offline data persistence using IndexedDB** and supported application deployment on **AWS EC2 and S3.**

Software Engineer | Alite Projects, Vadodara | July 2021 – May 2024

- Developed and tested **Solidity smart contracts** using **Hardhat and ERC-20/ERC-721 standards,** executing **800+ testnet transactions** and optimizing gas consumption by **10%.**
- Progressed from intern to full-time Software Engineer, contributing to Web3 applications, **frontend development, and blockchain integrations.**

- Built **React.js Web3 interfaces** using **Ethers.js and RainbowKit,** integrating **6+ wallet providers** and **real-time transaction tracking** to improve wallet connectivity and transaction visibility.
- Developed **responsive, reusable interfaces** using **React.js, JavaScript, HTML5, CSS3, Bootstrap, and jQuery**, improving UI consistency and maintainability across decentralized applications.

PROJECTS

HRMS – IITIL | Enterprise SaaS

- Developed features across **nine HRMS modules** using **React.js and TypeScript**, covering employee lifecycle, organization management, leave, attendance, and document management.
- Implemented **permission-aware interfaces using role-based access control (RBAC)** to support secure, role-specific enterprise workflows.
- Built interactive **Leave, Holiday, and Attendance calendars using FullCalendar,** alongside validated workflows for shifts, rosters, overtime, and employee requests.
- Applied **specification-driven development with GitHub Spec Kit** to translate requirements into implementation plans and coordinate frontend development with backend API contracts.

SolBI – Helios Solutions | Chat-Driven Business Intelligence

- Developed a **chat-driven Business Intelligence platform** using **Next.js and React,** enabling natural-language business data queries and interactive dashboards.
- Implemented **Server-Sent Events (SSE)** to **stream AI-generated responses incrementally**, enabling users to view results as they arrived.
- Integrated **Plotly and React-Leaflet** to deliver interactive **data visualizations, trend analysis, and geospatial insights.**
- Contributed to **backend development using Express.js and MongoDB,** implementing **REST APIs and data models** for chat sessions and saved dashboards.
- Managed **application state and caching with Redux Toolkit, mitt, and IndexedDB,** alongside localization, PayPal integration, and a validated query editor.

Accomplishr – Helios Solutions | Publishing & Video Sessions

- Developed a **modular publishing platform** using **Nuxt.js, Vue Composables, and Pinia**, supporting blog creation and content management.
- Integrated **Zoom Video SDK** and **event-driven communication** with mitt to support virtual fireside chats and video sessions.
- Built **session-booking workflows using Zod validation and date-fns,** delivering responsive interfaces for scheduling, blogs, chat, and session management.

Solidify – Alite Projects | DAPP

- Developed a **Web3 DApp** using **Next.js, React.js, and Tailwind CSS**, integrating blockchain functionality through **RainbowKit, Wagmi,** and **ERC-20/ERC-721 smart contracts.**
- Implemented **ICO, governance token, and airdrop features,** contributing to application schema design and smart contract testing using Hardhat..

EDUCATION

Bachelor of Engineering | Neotech Technical Campus (GTU) | 2016 – 2020 | CGPA: 7.25

Higher Secondary (GSEB) | 2014 – 2016
